

## **Dimensional Layering – Materials List and Kit Information**

The kit fee for the workshop will be between \$40 and \$60 depending on the cost of silver. It will include everything needed to make the projects except for silver sheets.

**Silver sheets are not included in the kit.**

If you plan to make all your projects with an 18 gauge sterling silver sheet, you will need a piece between 1" X 6" and 2" X 6". You may also bring some 20 gauge sheets or your 18 gauge can be rolled out to 20 gauge if you decide to use that for part of your project. I will be bringing 18 and 20 gauge sterling silver sheets that you can purchase from me in case you were not able to buy your own, or if you need extra.

The projects can all be made with: copper sheet, brass sheet, a mixture of metals or all sterling silver.

### **The Kit includes:**

1. Sterling silver crimp beads in different lengths with an inside diameter that will fit 18g and 20g wire.
2. 18g & 20g brass escutcheon head pins
3. easy, medium and hard silver solders
4. 18g & 20g brass & copper sheet
5. 18g & 20g round silver wire for making your own silver head pins
6. 14g square sterling wire
7. 1 x 3mm and 1 x 4 mm rectangular sterling silver wire
8. A variety of sterling silver tubing sizes
9. A very limited selection of faceted stones and cabochons.

I will be setting out all these things in the workshop and everyone can help themselves to what they need. (There won't be kit bags because everyone will likely have different needs.)

While not necessary, participants are welcome to bring stones, stone settings, stamped pieces of silver, water or broom castings, fused silver pieces, or anything else they might want to include. I will also be bringing extra materials for purchase like other gauges of silver sheet & wire, etc. just in case anyone needs them.
